

why you should have a built in vacuum system

## Benefits of an Easy-Flo central vacuum

Easy-Flo Central Vacuums provide up to double the cleaning power of ordinary portable vacuum cleaners. This extra power cleans carpets deeper making them healthier for children as well as extending the life of carpet and rugs. All dust, odors and allergens are removed completely from living spaces making Easy-Flo an excellent choice for those suffering from allergies. In addition to being quiet and convenient, installing a Easy-Flo central vacuum is a valuable investment for any home.

a better way to clean your home

## Lifetime Power Unit Warranty

All Easy-Flo vacuum units carry a Lifetime Warranty to the original purchaser at the original installation address. The Lifetime warranty covers the entire unit, excluding items which require normal replacement such as filters or carbon brushes. The central vacuum unit must be serviced every 5 years by an authorized Easy-Flo dealer at which time filter and carbon brush inspection and/or replacement is performed.

## 3 Year Accessory Warranty

All accessories including hoses, power-brushes and tools carry a 3 year warranty excluding consumables.

Commercial applications carry a limited warranty. Please contact your authorized dealer for details.

## EASY-FLO + Eco Friendly

Easy Flo central vacuums can reduce cleaning times in half which significantly cuts down energy use.

Unlike the many "disposable" products today, Easy-Flo vacuums are designed to last a lifetime.

The steel canisters, motor & packaging of all Easy-Flo vacuums are fully recyclable.

# EASY-FLO super quiet series

The newly designed SQ Series by Easy-Flo combines both quiet operation and superb performance in four impressive models. The SQ9020/9055's self cleaning filter and easy-dump receptacle provide convenience while the SQ9010/9060 paper bag models offer a simple alternative for allergy sufferers. Quiet enough for a condo and powerful enough for a 6000 sq. ft home the SQ models are a "Better way to Clean". Ask your dealer for a demo and hear the Easy-Flo difference.

## SQ9010

This Super-Quiet paper bag vacuum is best suited for small homes, condos, apartments or where space is limited. 3 gallon dirt capacity.

## SQ9025

Super-Quiet vacuum with self cleaning filter and convenient 3 gallon easy dump bucket. 604 Air watts provide ample cleaning power for homes up to 3000 sq ft.

## SQ9055

The largest in our Super-Quiet series this unit has extra air flow for larger homes. This 604 air watt machine features an 8 gallon dirt capacity canister, self cleaning filter and dual intakes for easy installation.

## SQ9060

Super-Quiet and powerful, this unit incorporates a paper bag for an extra layer of filtration. Recommended for allergy sufferers.

**AIR WATTS** are a combination of water lift [suction] and CFM [air flow]. This is the truest measure of cleaning power at the "business end" of your built-in vacuum.

**WATER LIFT** is suction measured in inches of water, not a representation of cleaning power.

**CFM** represents Cubic Feet of air movement per Minute, and isn't a measure of cleaning power.

Model	Motor	Air Watts	CFM	Water Lift	Amps
SQ9010	2 Stage 5.7"	533	120	128	12
SQ9025	2 Stage 5.7"	604	126	139	13
SQ9055	2 Stage 5.7"	604	126	139	13
SQ9060	2 Stage 5.7"	604	126	139	13
EF1750	3 Stage 7.2"	530	102	145	14.2
EF2300	2 x 2 Stage 7.2	1098	238	120	27

# EASY-FLO premier series

## EF1750

Premier single motor quiet vacuum with powerful 3-stage 7.2" motor. Our best machine for custom home builder applications.

## EF2300

The most powerful central vacuum in the industry. This vacuum is powered by dual 7.2" high air watt commercial grade motors.

## Why EASY-FLO?

Easy-Flo offers an unbeatable Lifetime warranty on all vacuum units  
 Easy-Flo uses only high quality American made vacuum motors  
 Easy-Flo utilizes separate electrical components which last longer, allow for easy troubleshooting and are less costly to repair  
 Easy-Flo uses micro-weave filters with built-in static discharge which produces the greatest airflow and filtration without compromising suction power.

Sweep Inlets are another great reason to install a central vacuum system in your home. Now, bare floor areas such as the kitchen, ensuite bathroom, laundry room or mud room can be cleaned quickly without having to reach for all of your attachments. Just grab a broom, kick open the sweep inlet and sweep away the mess.
